FULL STACK SOFTWARE ENGINEER

Semi-pro soccer player turned software engineer. Committed, self-motivated, versatile, and a natural problem solver with strong critical thinking, teamwork and communication skills. Quick to learn new systems with the ability to thrive in independent and collaborative work environments. Strong qualifications in creative problem-solving, sales, marketing and leadership. Familiar with debugging, data structures, algorithms and OOP. Currently building projects with the MERN (Mongo, Express, React, Node) stack using the following tools.

- Express / jQuery / JSON
- Handlebars / HTML / CSS
- JavaScript / Python / Node
- MySQL / MongoDB
- React & Redux/ NPM / APIs
- Git & Github /Python /
- Firebase
- Bootstrap / Materialize / UI
- Gh-pages / Heroku / Postman

DEVELOPMENT EXPERIENCE

Facebook Dev Community Hackathon – Finalist

A Facebook Developer Community Hackathon, our team and idea, “Soci-AR”, focused on social Impact and was one of the top 5 teams from 28. I was responsible for all the AR features and presentation.

- SparkAR, DialogFlow
- <https://devpost.com/software/sociar>
- <https://www.facebook.com/ChangeWithAR/>

GS1 US Trace-a-thon -- Winner

Supply chain focused hackathon hosted by GS1. Our idea, “Good Steward”, won Best Use of Technology from 20 teams. I created the react components, the front end, presented, conversed with judges and was instrumental in idea development.

- React, Docker, JavaScript, CSS
- 2D Capable & Bluetooth enables tags

Meal Planner App

A react app I built as part of the team, I was responsible for the react components and assisted with the front end and API routing. This is an app that allows you to enter health and lifestyle information, we will then calculate an appropriate diet and connect the user with meal plans and grocery options.

- MERN Stack (MongoDB, Express, React, Node), Redux, Bcrypt, Passport, JSON web tokens
- <https://github.com/denzelhartshorn/Meal-Planner>

Javascript 30 Day Challenge

This is a series of projects I produced to demonstrate my competence with Javascript.

- Arrays, variables, several games, CSS, NavBar & more
- <https://github.com/denzelhartshorn>

Full Stack e-Commerce Website

This is a side project I am building independently . A full-stack e-Commerce site with, local storage, transaction capabilities and authentication. MERN (Mongo, Express, React, Node), Braintree
